Arrow Tech Expo - Event Lead Retrieval

Your team will have immediate access to attendee contact information through QR-Code vCard barcodes printed on each badge. These 2-D barcodes enable quick and seamless addition of key customer details directly to your phone's contact list.

Additionally, you can use a compatible Android or iPhone app to scan badges, capture data, add notes, and export the information as a .CSV file to any email address you choose. Recommended is BadgeScanner™ Lead Retrieval - iPhone - Android

This streamlined process ensures fast and efficient follow-up with every customer interaction during the event.

Please ensure your team reviews this letter and the instructions below to prepare for a successful experience. Sample customer labels are included to help you test your data capture method in advance.

There are 3 potential ways we suggest that you capture customer information.

1. Use your phone's camera to input vCard information directly into you phone contacts
2. Use of a QR-Code scanner App to capture information and add to your phone contacts
3. Use of BadgeScanner™ Lead Retrieval - iPhone - Android

USE OF YOUR PHONES CAMERA TO INPUT vCARD INFORMATION

Both iPhone and Android have the capability of capturing QR-Code's by just using your camera. Open your camera application and focus on a QR-Code - an icon should appear when the camera notices this is a QR-Code. You can then tap the icon, and you will be given several options, one to save this on your phone contacts.

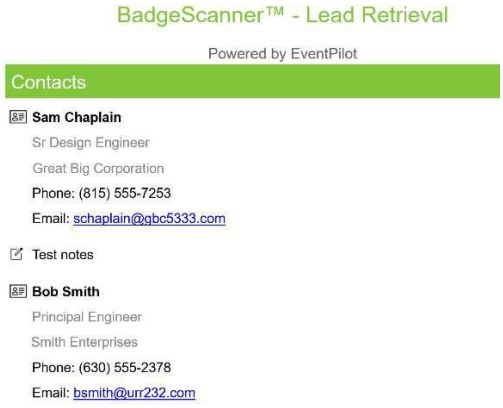

You can download BadgeScanner(tm) software here...

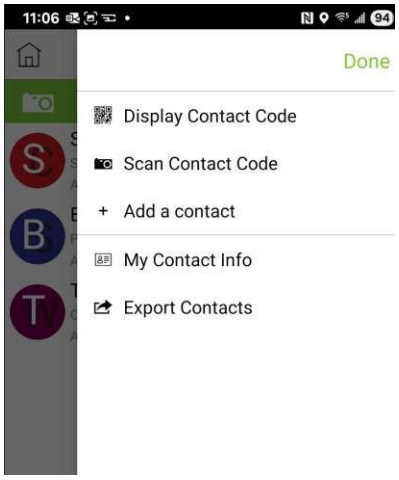

Apple iPhone...
https://apps.apple.com/us/app/badgescanner-lead-retrieval/id1341776784
Android...
https://play.google.com/store/apps/details?id=com.eventpilot.scan18&%20%20hl=en-US

The interface has a simple Scan Contact Code button that will allow you to scan attendee badges. After scanning a badge you can Add Notes.

At anytime during the event or after, you can Export All Contacts to the email address of your choosing. You will be emailed a .CSV file that you can use for follow up.
